“Public Works Announces 2021-2022 Paving Schedule.”

The Public Works Streets’ Division will pave and upgrade ADA ramps.

The City of Canby’s Public Works department has announced its annual paving schedule for the 2021 – 2022 fiscal year.

The City will repave and upgrade ADA ramps on NW 2nd Avenue from Holly Street to Grant Street, and Berg Parkway/13th Avenue to SW Ivy Street. Paving is funded by the Street Maintenance Fund, and the ADA ramp upgrades will be to be paid by local gas tax revenues.

The Street Maintenance Fee is used to maintain, repair, and reconstruct City of Canby streets. The local gas tax is used for items such as repair and replacement of sidewalks and ADA ramps. The Street Maintenance Fee generates approximately \$600,000 annually and local gas tax revenue generates approximately \$400,000 annually.

Eagle-Elsner Inc. was awarded the contract for the upgrades after a competitive Request for Proposals (RFP) process. Paving work will begin in July 2021 at the beginning of the City’s fiscal year. In 2018, the streets were rated by the Pavement Condition Index (PCI) which creates ratings for road conditions. Public Works’ Streets Division reviews the PCI yearly to determine highest priorities for which roads to improve. Over the last 14 years, there has been a combined total of 31.5 miles of street maintenance work completed due to the Street Maintenance program.

The scope of work for Eagle-Elsner includes installing approximately 6,000 tons of asphalt. Additionally, the work plan will retrofit an estimated 32 ADA ramps, including curbs and sidewalks. The project was designed by engineering firm Curran McLeod, Inc.

“I would like to thank the residents and businesses of Canby for the support of our funding sources to keep our roads in top condition.” Jerry Nelzen, Interim Public Works Director, remarked.
